

I respectfully urge the FCC to reject the NAB's petition 04-160 in favor of XM Radio's continued coverage of local weather and traffic. In my opinion, it is inappropriate to concentrate the delivery of information via radio waves in the hands of just a few people/companies. I pay for a subscription to XM Radio because of the range of programs, viewpoints, musical styles, and political discussions available, most of which are not available through the regular AM and FM stations in my area. Because it is a paid service I have subscribed to, I do not wish to have NAB control what I'm allowed to hear or not hear. I do not appreciate censorship, whether it be via government channels or via commercial or trade entities. Please reject NAB's petition 04-160.
